LED light inside door frame

Left hinged glass door

Bottle Cooler with Left Hand Hinged Door

To save you the trouble of reversing the door, we have introduced this model with a left hinged door. The model is otherwise identical to the version with the right hinged door.

The CEV425 L/H cooler is perfect for keeping drinks cold - in smaller and larger shops, delis, cafes, restaurants, canteens, offices, gyms etc.

It is a highly presentable bottle cooler great for display. It has internal LED lighting in the door frame, which attracts attention to the content of the unit. And it is ideal for branding.

Our range of CEV bottle coolers is available with and without canopy, in black and in white.
